

Structured Medicine Delivery Systems

Steven's can provide your medicine and custom delivery system. Your residents can effectively receive the medications and supplements they require.

Group Homes, Assisted Living, Board and Care and Senior Care facilities are faced with the challenge of providing consistent, structured medicine and supplement delivery for their residents. Steven's Pharmacy can provide the structured delivery system you need for each of your patients at competitive costs. We've been doing it for over 30 years.

We can deliver daily, weekly or monthly to your facility as required. Our pricing is competitive with other pharmacies. We are in Orange County.

We can structure the medicine in any format you require.

- Unit Dose packs
- Repackage resident prescriptions into Structured Delivery
- Multi-pill dose packs
- Single Prescription packs
- Customized delivery

Now you can eliminate dispensing errors, assist your nurse aides and improve billing and fulfillment. Calls before noon can be delivered same day in many locations. All patients are billed directly on a monthly basis. All primary insurance, supplementary insurance, Medicaid and Medicare accepted.

Please call us so that we can design the most effective program for your facility and help you to manage the important task of managed delivery.

Generic Medicines • Brand Name Medicines • Compounded Medicines • Supplements and Vitamins • Custom Dosage and Custom Delivery Format

"Steven's Pharmacy has been serving our residents for over 2 years now. We love working with them. They are prompt and attentive to the needs of our residents."

*G. Gertrudes
Irvine Cottage*

Who Needs Personalized Medication Solutions?

Children, seniors, women, men, impaired individuals, disabled individuals, individuals with allergies and content sensitivity, athletes, workers, and individuals who are suffering from chronic and life altering diseases. These include:

- Patients who need specialized dosing due to age-related issues, Pediatric and Geriatric.
 - Patients who have:
 - Multiple health care issues that impact a drug's absorption or elimination.
 - Allergic reactions to inert ingredients such as binders or dyes in commercially available products.
 - Difficulty in absorbing the medication via the traditional delivery process of a commercially available product, i.e. can't swallow or are sensitive to topically applied products.
 - Hospitalized patients who need lifesaving intravenous medications.
- AND
- Veterinary patients that range in size from a parakeet to an elephant and everything in between are just a few of the patients who are dependent upon personalized medication solutions.
